

Star Anise

Star anise (*Illicium verum*) for export, made to order to your specification. Species identity, volatile oil and moisture on the NABL CoA. Price on request.

Specification

Made-to-order line. The parameters below are agreed against the buyer's specification on the purchase order and reported per lot on a NABL-accredited Certificate of Analysis. No list-price or list-spec figures are published for this line.

Parameter	Basis
Botanical name	<i>Illicium verum</i>
Species identity	Confirmed to the level your specification requires — ask before ordering
Origin	Confirmed on the purchase order
Grade	Agreed against your specification
Volatile oil	Measured and reported on the NABL CoA
Broken and imperfect stars	Measured and reported on the NABL CoA
Moisture	Measured and reported on the NABL CoA
Extraneous matter	Measured and reported on the NABL CoA
Ethylene oxide	Not detected

Reference standards

Public standards and trade terms buyers write specifications against. They are reference points, not SpiceModo commitments: the figures that bind are the ones agreed on the purchase order and reported on the lot Certificate of Analysis.

Reference	Detail
Product standard	ISO 11178:1995 — Star anise (<i>Illicium verum</i>), specification
Test methods	Volatile oil ISO 6571 · moisture ISO 939 · extraneous matter ISO 927
Grades and trade terms	Species identity is the specification that matters: <i>Illicium verum</i> is the culinary species; <i>Illicium anisatum</i> (Japanese star anise) is toxic and looks similar
HS heading	0909.61 (badian, neither crushed nor ground)

Forms and packaging

- Whole stars — graded to your specification.
- Broken — on request, where appearance does not matter and cost does.
- Ground — on request; grind size specified by you.
- Packing — agreed on the PO.

Commercial terms

Made to order against a confirmed purchase order, so lead times are longer than our stocked lines. Price and minimum order quantity are quoted per contract on an FOB or CIF basis — there are too many variables in origin, grade, packing and freight for a list price to mean anything. Ask and we will put a number and a date against your specification.

Compliance and documents

Every lot ships with a NABL-accredited Certificate of Analysis, a Certificate of Origin and a Phytosanitary Certificate. Ethylene oxide is not used at any stage; residues are reported against the EU sum limit of 0.1 mg/kg for ethylene oxide and 2-chloroethanol under Reg. (EC) 396/2005, and against the US tolerance of 7 ppm under 40 CFR 180.151. Aflatoxin and ochratoxin A are reported against the maximum levels in Reg. (EU) 2023/915.

Issued by Vasundhara Performance Solutions Pvt. Ltd., H.No. 10-2-309, Flat No. 201, Sudha Vaishnavi Residency, Street No. 4, West Maredpally, Hyderabad, Telangana 500026, India. Restates the published specification at spicemodo.com/products/star-anise.html as of 13 September 2026; binding values are those on the purchase order and the lot Certificate of Analysis.
